DETAILED ACTION

Allowable Subject Matter

1. Claims 1-20 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art fails to teach or fairly suggest the presently claimed determination of heating value of a fuel gas by measuring a chemiluminescent emission of an excited sample.
3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hutte (1992) teaches detection of cycloalkanes in jet fuels by measuring chemiluminescence. Tacke et al teach an absorption spectroscopy method for measuring heating value. Patterson teaches flame photometry for analyzing components of a fuel gas. Clarke teaches fluorescence sensing of the presence of hydrocarbon fuels for detecting leaks. Froelich et al disclose an electrical sensing method for determining heating value of a fuel gas. Ratfisch teaches flame ionization detection of hydrocarbon fuel components. The remaining references cited are considered pertinent as background information generally related to applicant's field of endeavor.

5. None of the cited prior art recognizes the ability to correlate a chemiluminescent emission from a fuel gas sample to the heating value of the fuel gas.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeffrey R. Snay whose telephone number is (571) 272-1264. The examiner can normally be reached on Mon-Fri.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jill A. Warden can be reached on (571) 272-1267. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
